

# XM3 MKII

## HEARING IS BELIEVING...

### A NEW PRODUCT - A NEW BENCHMARK

The new XM3 MkII creates a new standard in floorstanding loudspeakers in terms of build quality, musicality, reliability, and overall value for money. The twin woofer floorstanding tower speaker has been designed to provide entry level audio lovers and videophiles with a new benchmark for performance and sonic enjoyment.

The 130mm mid-bass drivers have been co-designed in collaboration with Dr Rod Crawford (Legend and Linn Fame) to provide speed, smoothness, and overall musicality. The drivers have been designed to perform better than many famous (and more expensive) European counterparts.

The tweeter is a 25mm silk dome, cooled internally using ferro fluid, and heat is also dissipated through a 12-fin heat sink on the back of the high grade neodymium magnet. For a compact tweeter it really outperforms many of its much more well known European rivals. With mild horn loading, the tweeter is designed to reproduce music effortlessly in a smooth and articulate way, whilst providing excellent on and off axis performance.

The cabinet has full 360 degree bracing, and has an extremely generous amount of acoustic dampening resulting in an extremely rigid, low resonance enclosure.

Components are all state of the art and of the highest quality. Crossovers use all air-cored inductors, non-ageing self-healing capacitors, non-inductive resistors, and high quality cable, to make the musical signal as natural, open and clear as possible. The frequency response is incredibly smooth and flat resulting in a very revealing and 'live' musical performance.

The XM3 MkII sound superb with all types of electronics, and unlike many loudspeakers in their price range, they also sound stunning on quality high end electronics and quality source material.

No stone was left unturned when developing what we believe is the best product we could for the money. We hope you will agree that after auditioning, the new XM3 MK II is a product of the highest quality that represents outstanding value for money, and delivers a remarkable level of performance.

### FEATURES AT A GLANCE:

#### DESCRIPTION:

3-WAY Bass reflex loudspeaker

#### FREQUENCY RESPONSE:

45Hz to 22kHz (+/-2.5 dB)

#### AMPLIFIER POWER:

125W

#### DRIVE UNIT DETAILS:

2 x 130mm Shielded Woofers

1 x 25mm Silk Dome Tweeter

with Heatsink, Ferro Fluid Cooled

#### CABINET STYLE:

Vented Enclosure

18mm MDF

Timber Veneer

Solid Timber Beading

#### Crossover:

12dB crossover @ 3.5kHz

#### DIMENSIONS (MM):

865(H)x 190(W)x 295(D)

#### NET WEIGHT:

18Kg

#### FINISHES:

Black, Jarrah, Oak

(others available on quotation)

#### WARRANTY:

10 YEARS
